

ESG Summary Report — Cotton

Report ID: 9e0357f7-1c40-42eb-aa28-136022ddaa0c | Generated: 2026-08-17 | By: Kartikey singh | Org: mani group

Executive ESG Summary

The analyzed textile waste demonstrates substandard environmental performance with a sustainability score of 32%. The material is highly recyclable with low contamination. Estimated CO₂ and landfill savings indicate positive environmental impact. Governance metadata confirms complete AI traceability, while social indicators are currently unavailable within the platform.

32	Poor	32	32
ESG Score	ESG Rating	Sustainability	Circularity

Environmental (E) Metrics

Sustainability Score	32.1 / 100
Environmental Rating	Average
Carbon Footprint	16.1 kg CO ₂
CO ₂ Savings	0.00 kg
Water Savings	0 L
Landfill Diversion	0.00 kg
Resource Recovery Score	0.0 / 100
Circularity Score	32.1 / 100
Waste Diversion Score	0.0 / 100
Recycling Recommendation	Hazardous Textile Waste
Material Recovery Score	31.2%

Social (S) Indicators

Compliance Status	Not Available
Waste Handling Safety	Not Available
Hazardous Material Detection	Hazardous Material Detected

Contamination Risk	Low Risk
Supply Chain Transparency	Not Available

Governance (G) Metadata

Prediction Confidence	87.0%
